

PEECHARA SATHWIK

Python Developer | AI & Data Analytics

peecharasathwik@gmail.com | +91 8019002245 | MREC, Hyderabad | github.com/sathwik2021 |
linkedin.com/in/peecharasathwik-90414432b

SUMMARY

Aspiring Python Developer with hands-on experience in NLP, Computer Vision, and AI-powered application development. Skilled in building end-to-end ML pipelines and integrating large language model APIs. Experienced in backend development, debugging, and developing scalable AI solutions.

EDUCATION

B.Tech in Computer Science (Data Science), Malla Reddy Engineering College, Hyderabad | 2023-2027
•**CGPA: 7.47 / 10**
Senior Secondary (XII), TSBIE - Science, Alphores Junior College Karimnagar | 2021-2023
•**Percentage: 70.4%**
Secondary (X), TSBSE, Alphores High School Karimnagar | 2021
•**CGPA: 10.00 / 10**

SKILLS

Languages: Python, Java | **Databases:** SQL (MySQL) | **Cloud:** Google Cloud Fundamentals | **AI / ML:** NLP, Transformers, Computer Vision, Machine Learning, Stable Diffusion, LoRA Fine-Tuning, Prompt Engineering | **Libraries:** NumPy, Pandas, OpenCV, Pillow, Diffusers, Hugging Face Transformers | **Tools:** Git, GitHub, Kaggle (cloud-based GPU training)

PROJECTS

NexusAI – AI Chatbot with NLP & Multimodal Input *Python | Flask | Groq API | Google Gemini API | MySQL | SQLAlchemy | NLP | PyMuPDF* 2025 – 2026

- Built a full-stack chatbot integrating Groq and Gemini with automatic provider failover, SSE streaming, and multimodal input (voice, image, file uploads via PyMuPDF).
- Designed a normalized MySQL schema via SQLAlchemy to log conversations and NLP metadata, and stress-tested the pipeline against adversarial and malformed inputs.

AI Manga Generation Pipeline – Text-to-Manga System *Python | Flask | Stable Diffusion 1.5 | LoRA | Gemini API | OpenCV | Pillow | Hugging Face* 2025 – 2026

- Architected a 3-stage GPU pipeline: Gemini for narrative beat extraction → 20-rule layout engine → LoRA fine-tuned Stable Diffusion for manga panel synthesis.
- Fine-tuned LoRA on Manga109 (15,500 steps, Kaggle dual T4), resolving production dependency conflicts and a symlink cache corruption bug along the way.

Codex Council — Multi-Agent LLM Code Review Pipeline *Python | Ollama | Groq / Gemini / Mistral / OpenRouter APIs* 2026

- Architected a multi-agent pipeline routing codebase queries to specialist teams (security, architecture, bugs, optimization) via a Generator → Critic → Verifier debate loop.
- Built a 6-provider LLM fallback chain with automatic key rotation, and fixed production bugs like JSON-escaping failures and a provider-naming collision silently disabling a team.

CERTIFICATIONS

Azure AI Fundamentals (AI-900) — Microsoft		Data Analytics Job Simulation — Deloitte (Forage)
Machine Learning Certification — Tutedude (Nov 2025)		Internship Certificate — AimR Edu (2024)
Data Structures — TechAugusta (Oct 2024)		Google Cloud Computing Foundations — Google (Apr 2026)

ACHIEVEMENTS & ACTIVITIES

- Participated in Vishesh Hackathon, demonstrating problem-solving and collaborative development skills under competitive conditions.
